

27 June 2024

# PRODUCTS - SUMMARY BY PURPOSE

-  Evidence found that the product is 'abortion-tainted' by one or more human cell lines having been used in production and/or testing.
-  Appears **not** to be 'abortion-tainted'.
-  Vaccine was **produced** in human cell lines

Column'**Info Source**': shows the category of the source of information regarding whether it uses a human cell-line:

AIH - Australian Immunisation Handbook

COG - Children of God for Life

EML - Email from a researcher

JNA - Journal Article

LOZ - Lozier Institute

PKI - Package Insert/Label etc.

PNT - Patent

Column'**Aus Sched**': Shows which Australian immunization schedules it is on.

Column'**Cell Lines**': For a tainted product, production and/or testing involved one or more of the human fetal cell lines shown.

Column'**Prod'd in? Y/N**': Indicates if the vaccine was**produced in** a human fetal cell line (not merely tested in one).

NOTE 1:**RA273** is actually "*Rubella virus obtained from aborted fetus kidney used in Rubella and MMR vaccines.*" (not a cell line)

NOTE 2: The same product ('Trade Name') may appear under multiple 'Purpose' categories in this report, e.g. multivalent vaccines.
