PRODUCTS - SUMMARY BY TRADE NAME

 Evidence found that the product is 'abortion-tainted' by one or more human cell lines having been used in production and/or testing.

 Appears **not** to be 'abortion-tainted'.

 Vaccine was **produced** in human cell lines

Column'**Info Source**': shows the category of the source of information regarding whether it uses a human cell-line:

AIH - Australian Immunisation Handbook

COG - Children of God for Life

EML - Email from a researcher

JNA - Journal Article

LOZ - Lozier Institute

PKI - Package Insert/Label etc.

PNT - Patent

Column'**Aus Sched**': Shows which Australian Immunization Schedules it is on.

Column'**Cell Lines**': For a tainted product, production and/or testing involved one or more of the human fetal cell lines shown.

Column'**Prod'd in? Y/N**': Indicates if the vaccine was **produced in** a human fetal cell line (not merely tested in one).

NOTE 1:**RA273** is actually "*Rubella virus obtained from aborted fetus kidney used in Rubella and MMR vaccines.*" (not a cell line)
